Bentel Security has developed the new Premium Line keypads in order to exceed the need for quality, reliability and accuracy in high-profile installations.

The elegant and innovative design makes the Premium keypad adaptable to any interior décor, offering the possibility to choose between surface and flush mounting.

Premium, has an integrated Proxi Key reader function and 3 programmable I/O, it is without a doubt the most suitable keypad when it comes to integrating high-performance and unique design.

# CLASSIKA SERIES

The new Classika Series keypads from Bentel Security satisfy the needs for reliability and simplicity in use, without sacrificing the winning design and adaptability to all interior environments.

Classika can be easily installed thanks to its Plug-in approach: the electronic are fixed on the cover and the terminals for wiring are on the back plate.

The clear communication of the key functions, the ability to adjust volume of signals and setting display contrast to optimize legibility in different lighting conditions makes Classika the most suitable product for standard installations with a good quality/price ratio.
